

Information Sheet

Manufacturer: Firma Frank Merkel
Heidweg 18
33189 Schlangen
Germany
Tel.: +49 5252 / 7241
Fax: +49 5252 / 82698
www.uss-glas.com

Usage:

The USS-Glas, as an anti-spatter cover lens, is placed in front of the eye shield of the welding hood for the protection of the filter lens during welding.

Metal spatter does not form on the lens during welding, thus ensuring a clear view for the welder.

Cleaning:

The USS-Glas can easily be cleaned with a damp cloth.

Storage:

USS-Glas is optimally stored vertically in a dry, temperature stable room.

Period of Use:

The period of use of the USS-Glas is dependent on the frequency and type of welding. It is recommended that the USS-Glas should be replaced when the welder believes the visibility is limited.

Packaging:

100 pieces per carton

Definition of the Markings:

Code of the Manufacturer _____ | ME CE

European Conformity Sign _____ |
